

Instructions for Authors

ITACCS welcomes the submission of manuscripts for publication in its journal, *TraumaCare*. Reports on airway management; new equipment; new drugs or new applications of old drugs; training programs for technicians, nurses, and physicians in trauma care; and trauma care in developing nations are encouraged. Reports of disaster management, original research in any aspect of trauma care, and case reports of difficult problems are also of interest. Topics related to injury prevention, prehospital care, improvements in hospital management of injured patients, long-term rehabilitation, and ultimate outcome after injury will be considered as well.

Publication Schedule

TraumaCare is published four times each year.

Peer Review

Manuscripts will be peer reviewed by the coeditors and other reviewers, including members of the editorial board, for content, adequacy of presentation, and interest to the readers of *TraumaCare*. Authors will be informed of editorial decisions regarding manuscript acceptance, requests for revisions to text, or manuscript rejection. Manuscripts accepted for publication will be copyedited by the managing editor according to standard rules of English and for compliance with journal style.

Manuscript Preparation

TraumaCare has adopted the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, as published in JAMA (277:927-934, March 19, 1997) and described at www.icmje.org. The desired manuscript length is 6 to 12 pages of double-spaced text. Please include learning objective(s) and an abstract as well as a minimum of four or five questions and answers for the CME section of the journal. Please indicate the correct answers. Authors' use of tables and illustrations is encouraged; written permission of the copyright holder is required for items previously published. Glossy prints of halftones are requested (rather than transmission of scanned images via the Internet); line art may be transmitted electronically. One print of each

figure is sufficient for manuscript review and publication. Questions about manuscript preparation may be directed to the managing editor (see contact information below).

Production/Publication

Along with notification of manuscript acceptance, the managing editor will ask the author(s) of each article to complete and sign a disclosure/copyright transfer form. Disclosure footnotes are included with all articles in *TraumaCare*. Articles published in *TraumaCare* are copyrighted by ITACCS. To request permission to reprint material published in *TraumaCare*, contact the managing editor.

Prints and disks, when supplied, will be returned to authors upon request.

Opinions expressed in *TraumaCare* are those of the authors and not necessarily those of ITACCS.

Manuscript Submission

Manuscripts can be submitted to the managing editor via e-mail or postal service. They will be forwarded to the journal's editor for preliminary review before being forwarded to peer reviewers. Manuscripts are received and reviewed with the understanding that they have not been published previously except in abstract form and that the author(s) will transfer copyright to ITACCS if the work is published in *TraumaCare*.
